Caged Tiger:
The Transformation of the Asian Financial System

Warren Hogan
Chief Economist

October 2014

The 'Asian Century' – an economic perspective
A New G10 – The A10!

- Asia's ascension will be led by 10 economies
- These 10 economies could account for 50% of global GDP by 2050

Source: CEIC and ANZ Research projections

Page 4

Why economic reform is so important to Asia

Avoiding the 'middle income trap'

- Many emerging Asian countries are now at middle income levels* following a rapid industrialisation in recent decades.
- The economic structures and policy frameworks that have underpinned Asia's industrialisation to date are unlikely to be appropriate for the next stage of economic development.
- A high-income consumer driven economy will require broad economic reforms in the emerging Asian economies over the decade ahead.
- Financial reform, that is de-regulation and the internationalisation of currencies, is central to the reform agenda:
 - *Increasingly complex economies require a sophisticated means of allocating capital efficiently;*
 - *Flexible markets and prices need to play a bigger role in emerging economies;*
 - *Regulation and supervision of the economy must be harmonised with worlds best practice.*

*Middle income is defined as GDP/capita of US\$5,000 to 10,000 per annum

Page 5

EM Asia growth outperformance narrowing

Reform is critical to maintaining strong growth

Source: Haver, ANZ Research

6

What the 'Asian Century' means for the Asian financial system

Three propositions

1. Size

- The Asian financial system will become much bigger than it currently is and will grow to a position of dominance in a global context.

2. Structure

- The underlying structure will change with less dependence on banks and larger capital markets.

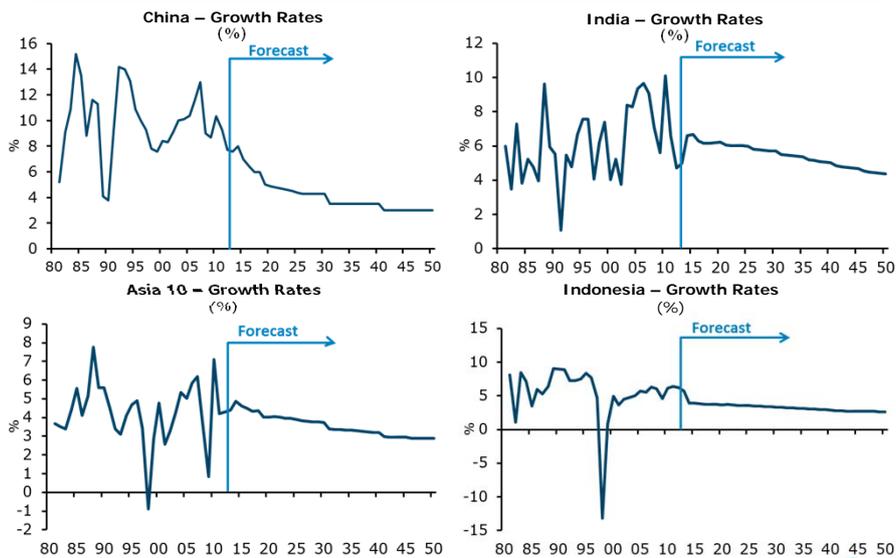

3. Global Impact

- The way the Asian financial system interacts with the world economy will radically change over the next decade.

Page 7

Economic growth is the primary driver of the size of a financial system.

Page 8

Over the past 15 years much of the 'Asian Surplus' has accumulated in FX reserve portfolios at central banks

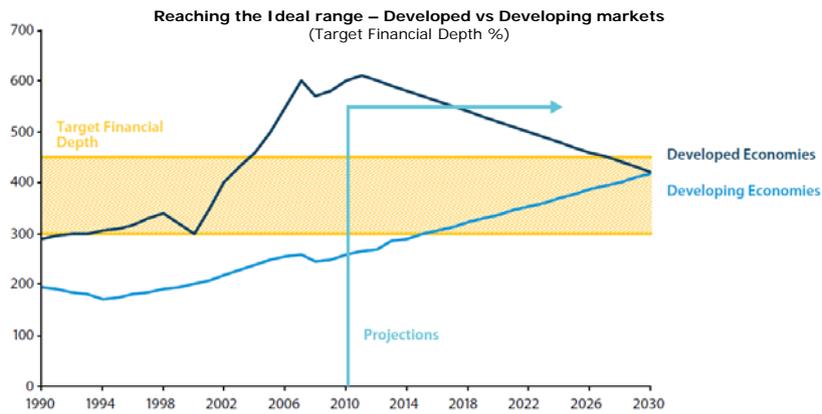

Source: CEIC and ANZ Research projections

Page 9

Asia's financial systems will deepen
Making the system bigger compared to the economy

- Financial Depth: Financial System* to GDP ratio

Source: World Bank GFDD and ANZ

* Financial system is defined in this report as bank assets + equity market capitalisation + total public and private bonds outstanding

Page 10

Proposition 1: Asia's financial system will become large
 Projections for the broad structure of the global financial system

	TOTAL FINANCIAL DEPTH					
	2010		2030		2050	
	% of GDP	USD trillion	% of GDP	USD trillion	% of GDP	USD trillion
World	386	246	395	448	420	976
Asia 10	383	69	420	228	500	678
Asia 10 ex Japan	344	36	404	174	502	603
United States	553	83	485	101	450	132
Eurozone	414	50	390	63	350	84

- Asia will become home to several financial capitals and a number of 'global champion' financial institutions.

Source: World Bank GFDD and ANZ projections

Page 11

Proposition 2: The structure of the Asian financial system will change. Rise of the capital markets, a transformation of banking

- The Asian financial system is currently **dominated by the bank sector**:
 - Banks are approximately 45% of global system, about 40% in the US and in Asia they are almost 55%.
- Banks will **shed the long-term financing role** for large corporations to the debt and equity markets:
 - Fixed income markets across Asia could triple in size over the next 15 years. Equity market capitalisation across the Asia 10 could rise from around \$US15trn at present to almost \$US70trn by 2030.
- The focus of the banking sector will shift over time towards the **emerging consumer and funding the SME sector**.
- There are no rules for what the precise structure of a financial system should look like, although a **diversity of funding sources** across the economy appears desirable.

Page 12

Asia could become home to some of the world's largest fixed income markets

- China will dominate the **growth** of the Asian bond markets as the RMB becomes a regional funding currency.
- The US will remain the largest national fixed income market for the next 15-20 years given the importance of the debt capital markets to the US economy.

USD, trillion	2010	2020	2030
United States	33	46	40
Europe	25	27	23
Asia 10	19	35	64
-China	3	11	27

Source: World Bank GFDD and ANZ projections

Page 13

Can China's equity market become the largest in the world? In the Asian century this is likely to happen by 2030

- The big equity opportunity in Asia will lie in China. This will be heavily associated with the privatisation program of State Owned Enterprises.
- Even with a widespread and successful privatisation program in China, it will still take China 10 years to overtake the US market cap.

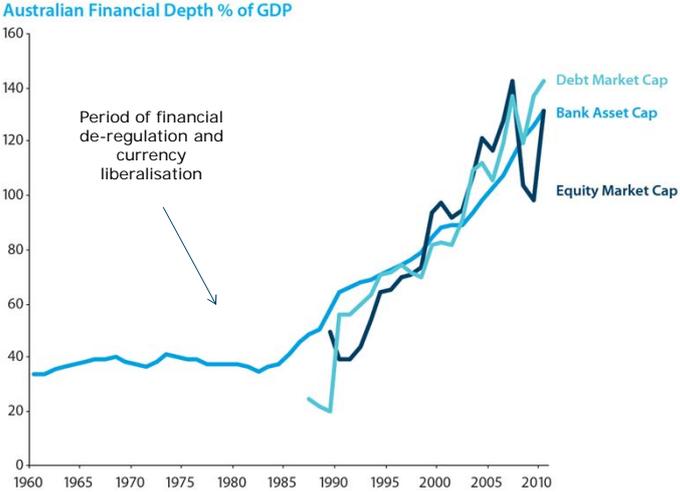

USD, trillion	2010	2020	2030
United States	17	27	25
Europe	6	10	12
Asia 10	13	33	68
-China	5	17	41

Page 14

Australia and Canada are examples of a well-balanced financial system

Source: World Bank GFDD and ANZ Research

Page 15

What does a financial centre look like?
 A 'niche' financial centre will be skewed in it's financial structure.

Source: World Bank GFDD and ANZ Research

Page 16

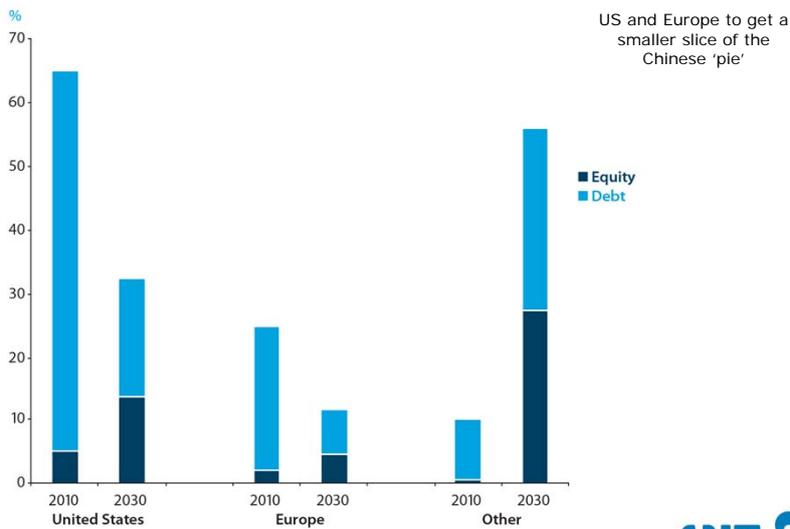

Proposition 3: The interaction of the Asian financial system with the rest of the world will change dramatically.

- The private sector will take a much bigger role in 'recycling' the Asian surplus (at the expense of the official sector). This will fundamentally alter the geographic and asset class characteristics of Asia's capital outflows.
- The Asian surplus is likely to shrink as currencies are floated and domestic consumption rises (assisting the process of global re-balancing);
- Asian FDI will grow rapidly. We could see Chinese total FDI to the rest of the world rise from less than \$1trn to almost \$10trn by 2030
- The US and Europe will receive less of the 'Asian surplus' potentially raising the cost of capital in those economies.
- The emerging economies of South, South-East Asia and Oceania will benefit from increased direct Asian capital flows – Asia will increasingly finance Asia. This should result in a lower cost of capital for these economies

The geographic and asset class characteristics of China's capital outflows will change radically over the next decade.

Changing Chinese international portfolio allocations

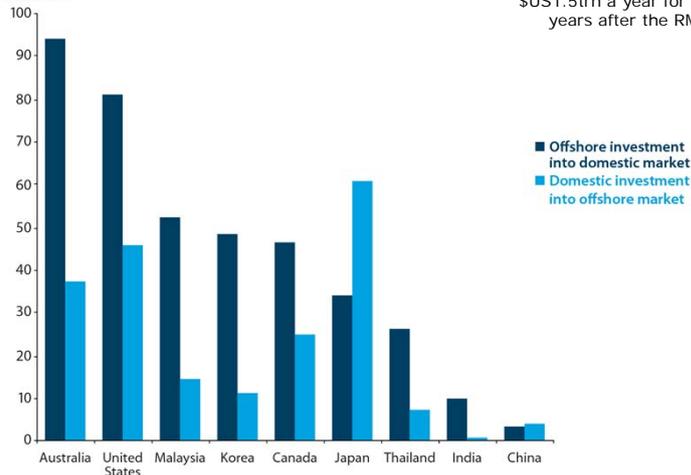

Source: World Bank GFDD, IMF and ANZ Research

As the Chinese capital account is liberalised, private portfolio capital flows will surge

Stock of portfolio investment (end 2010)

% of GDP

Chinese private portfolio capital outflows could increase by almost \$US1.5trn a year for the first five years after the RMB floats

Source: World Bank GFDD, IMF and ANZ Research

Page 19

Risks and Challenges

The reform agenda is extensive and gives a greater role to markets

- Financial liberalisation is historically associated with financial imbalances – macro economic policy settings are critical throughout the reform process.
- Reform requires strong political support as it will challenge incumbent interests.
- Government must relinquish some control of the economy to private markets and then establish strong policy and supervisory frameworks.
- Trust and confidence are critical factors to internationalising a financial system. Many jurisdictions will need legal and governance improvements.

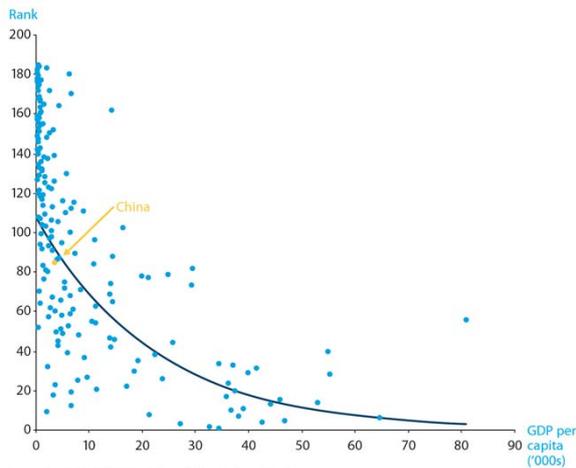

Page 20

Political and regulatory improvements are required

Ease of doing business ranking and GDP per capita ('000s)

Improvements in governance typically occurs as income increases

There are very few middle to high income countries that are regarded as difficult to do business within

Source: World Bank GFDD and Ease of Doing Business databases.

Page 21

China Now!

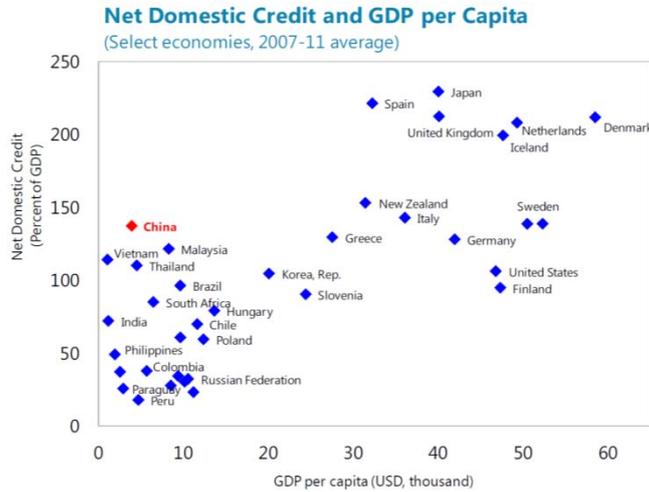

The why, how and when of Chinese financial liberalisation

- China's financial system is no longer able to serve an increasingly sophisticated and complex economy. This is creating problems:
 - Shadow banking activities are booming;
 - Parts of the property market are at extreme valuations.
- The Chinese leadership is now well advanced in the financial de-regulation and internationalisation process:
 - Offshore RMB trading centres and swap lines with foreign central banks;
 - Partial capital account liberalisation;
 - Domestic market reform agenda including interest rate liberalisation in 1-2 years.
- Sequencing of reform is important:
 - Get the domestic markets right first, then open them up to the international financial system.
 - Cannot simply open up capital account until domestic financial system is able to cope.
- Market determined domestic interest rates by 2015 and RMB floating by 2017?

Page 22

China's debt levels have over run it's development

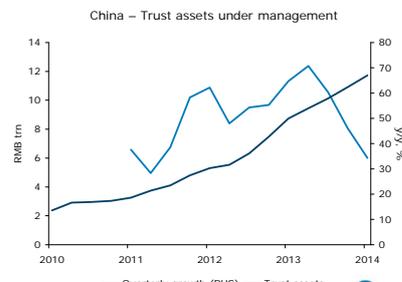

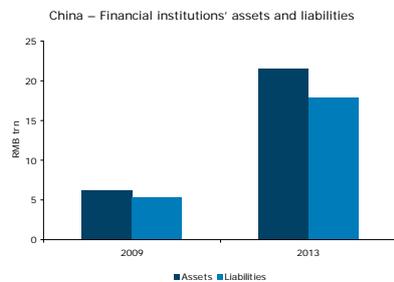

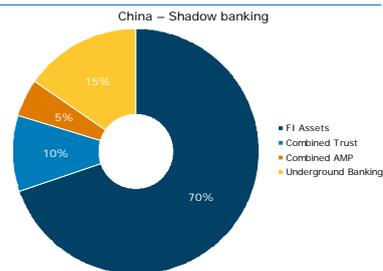

Source: IMF, ANZ Research

23

Shadow banking activities have expanded rapidly in the past few years

- China's shadow banking consists of financial institution business (off-balance-sheet assets by banks not falling into normal regulation), trust products, and underground banking.
- We estimate that China's shadow banking could have reached around RMB33trn by mid-2014, equivalent to about 58% of 2013 GDP or 20% of total bank assets in China.

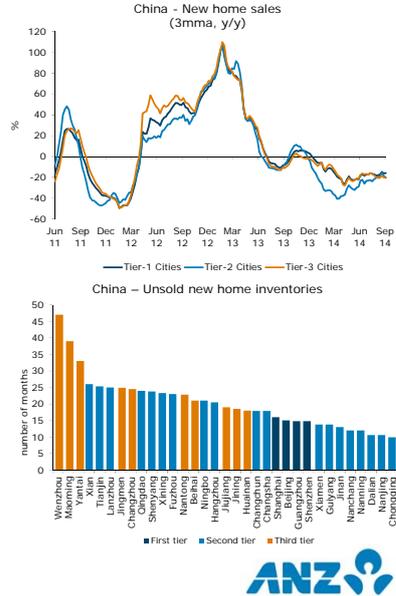

24 24

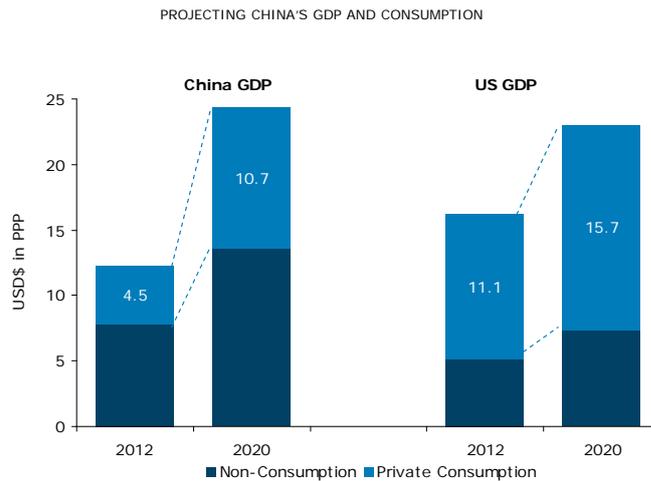

With limited options for saving, Chinese individuals have been pouring money into residential property – a bubble?

- New home sales in all tiers of Chinese cities dropped sharply in the past few months, and the unsold new home inventories have picked up significantly since Q4 2013 as well.
- The second-hand housing market is also slowing. The Centaline second-hand home index, which is largely driven by housing prices, trended down on a year-on-year basis since the beginning of 2014 in first tier cities.
- While all these indicators appear to have pointed to a slowdown in China's property market, we do not think they foretell that China's housing market is about to collapse.
- In our view, China's property market is experiencing a cyclical slowdown, which is normal and has occurred repeatedly in the past economic cycles.

25 25

By 2020, China's private consumption will represent 44% of its GDP and 70% of the size of the U.S. consumer market

Note: China's GDP is assumed to grow at an average real rate of 6.7% and the price level is assumed to grow by 3.5% a year. For the US, the respective assumptions are 3.0% and 2.5%. In nominal terms, the values of GDP of China and the US will be USD18trn and USD24trn respectively by 2020, keeping the exchange rate unchanged.

Source: IMF, ANZ Research

26

Implications for Australia

Chinese capital inflows could reduce the cost of capital in Australia

- Current FDI stock in Australia is AUD650 billion or about 40% of GDP. China accounts for less than 5% of this.
- FDI accounted for around one-third of all capital formation in Australia since 2000 – half in the mining sector
- Chinese FDI could top AUD200 billion (over a tenfold increase from 2012 levels) by 2030 if Australia's share of Chinese FDI (2.5%) remains unchanged.
- In 2012-13, most of Chinese FDI approvals were for investment into the resources sector and real estate. This should expand to a broader range of industries
- Chinese investors are likely to significantly increase their exposure to Australian dollar portfolio assets after a full liberalisation of the Chinese capital account. This would effectively lower the cost of capital to the Australian economy.

Page 27

Implications for Financial Centres

Shanghai as the world financial centre

- Shanghai (China) and Singapore (SE Asia) could become the world largest financial centres.
- Hong Kong, Tokyo, Seoul, Sydney and Mumbai would could be second tier regional specialist centres.

Further copying or duplication of this publication is strictly prohibited. **New Zealand.** This publication is intended to be of a general nature, does not take into account your financial situation or goals, and is not a personalised adviser service under the Financial Advisers Act 2008. **Oman.** This publication has been prepared by ANZ. ANZ neither has a registered business presence nor a representative office in Oman and does not undertake banking business or provide financial services in Oman. Consequently ANZ is not regulated by either the Central Bank of Oman or Oman's Capital Market Authority. The information contained in this publication is for discussion purposes only and neither constitutes an offer of securities in Oman as contemplated by the Commercial Companies Law of Oman (Royal Decree 4/74) or the Capital Market Law of Oman (Royal Decree 80/98), nor does it constitute an offer to sell, or the solicitation of any offer to buy non-Omani securities in Oman as contemplated by Article 139 of the Executive Regulations to the Capital Market Law (issued vide CMA Decision 1/2009). ANZ does not solicit business in Oman and the only circumstances in which ANZ sends information or material describing financial products or financial services to recipients in Oman, is where such information or material has been requested from ANZ and by receiving this publication, the person or entity to whom it has been dispatched by ANZ understands, acknowledges and agrees that this publication has not been approved by the CBO, the CMA or any other regulatory body or authority in Oman. ANZ does not market, offer, sell or distribute any financial or investment products or services in Oman and no subscription to any securities, products or financial services may or will be consummated within Oman. Nothing contained in this publication is intended to constitute Omani investment, legal, tax, accounting or other professional advice. **People's Republic of China.** If and when the material accompanying this publication does not only relate to the products and/or services of Australia and New Zealand Bank (China) Company Limited ("ANZ China"), it is noted that: This publication is distributed by ANZ or an affiliate. No action has been taken by ANZ or any affiliate which would permit a public offering of any products or services of such an entity or distribution or re-distribution of this publication in the People's Republic of China ("PRC"). Accordingly, the products and services of such entities are not being offered or sold within the PRC by means of this publication or any other method. This publication may not be distributed, re-distributed or published in the PRC, except under circumstances that will result in compliance with any applicable laws and regulations. If and when the material accompanying this publication relates to the products and/or services of ANZ China only, it is noted that: This publication is distributed by ANZ China in the Mainland of the PRC. **Qatar.** This publication has not been, and will not be, lodged or registered with, or reviewed or approved by, the Qatar Central Bank ("QCB"), the Qatar Financial Centre ("QFC") Authority, QFC Regulatory Authority or any other authority in the State of Qatar ("Qatar"); or authorised or licensed for distribution in Qatar, and the information contained in this publication does not, and is not intended to, constitute a public offer or other invitation in respect of securities in Qatar or the QFC. The financial products or services described in this publication have not been, and will not be, registered with the QCB, QFC Authority, QFC Regulatory Authority or any other governmental authority in Qatar; or authorised or licensed for offering, marketing, issue or sale, directly or indirectly, in Qatar. Accordingly, the financial products or services described in this publication are not being, and will not be, offered, issued or sold in Qatar, and this publication is not being, and will not be, distributed in Qatar. The offering, marketing, issue and sale of the financial products or services described in this publication and distribution of this publication is being made in, and is subject to the laws, regulations and rules of, jurisdictions outside of Qatar and the QFC. Recipients of this publication must abide by this restriction and not distribute this publication in breach of this restriction. This publication is being sent/issued to a limited number of institutional and/or sophisticated investors (i) upon their request and confirmation that they understand the statements above; and (ii) on the condition that it will not be provided to any person other than the original recipient, and is not for general circulation and may not be reproduced or used for any other purpose. **Singapore.** This publication is distributed in Singapore by the Singapore branch of ANZ solely for the information of "accredited investors", "expert investors" or (as the case may be) "institutional investors" (each term as defined in the Securities and Futures Act Cap. 289 of Singapore). ANZ is licensed in Singapore under the Banking Act Cap. 19 of Singapore and is exempted from holding a financial adviser's licence under Section 23(1)(a) of the Financial Advisers Act Cap. 100 of Singapore. In respect of any matters arising from, or in connection with the distribution of this publication in Singapore, contact your ANZ point of contact. **United Arab Emirates.** This publication is distributed in the United Arab Emirates ("UAE") or the Dubai International Financial Centre (as applicable) by ANZ. This publication: does not, and is not intended to constitute an offer of securities anywhere in the UAE; does not constitute, and is not intended to constitute the carrying on or engagement in banking, financial and/or investment consultation business in the UAE under the rules and regulations made by the Central Bank of the United Arab Emirates, the Emirates Securities and Commodities Authority or the United Arab Emirates Ministry of Economy; does not, and is not intended to constitute an offer of securities within the meaning of the Dubai International Financial Centre Markets Law No. 12 of 2004; and, does not constitute, and is not intended to constitute, a financial promotion, as defined under the Dubai International Financial Centre Regulatory Law No. 1 of 200. ANZ DIFC Branch is regulated by the Dubai Financial Services Authority ("DFSA"). The financial products or services described in this publication are only available to persons who qualify as "Professional Clients" or "Market Counterparty" in accordance with the provisions of the DFSA rules. In addition, ANZ has a representative office ("ANZ Representative Office") in Abu Dhabi regulated by the Central Bank of the United Arab Emirates. ANZ Representative Office is not permitted by the Central Bank of the United Arab Emirates to provide any banking services to clients in the UAE. **United States.** If and when this publication is received by any person in the United States or a "U.S. person" (as defined in Regulation S under the US Securities Act of 1933, as amended) ("US Person") or any person acting for the account or benefit of a US Person, it is noted that ANZ Securities, Inc. ("ANZ S") is a member of FINRA (www.finra.org) and registered with the SEC. ANZ S' address is 277 Park Avenue, 31st Floor, New York, NY 10172, USA (Tel: +1 212 801 9160 Fax: +1 212 801 9163). Except where this is a FX-related or commodity-related publication, this publication is distributed in the United States by ANZ S (a wholly owned subsidiary of ANZ), which accepts responsibility for its content. Information on any securities referred to in this publication may be obtained from ANZ S upon request. Any US Person receiving this publication and wishing to effect transactions in any securities referred to in this publication must contact ANZ S, not its affiliates. Where this is an FX-related or commodity-related publication, it is distributed in the United States by ANZ's New York Branch, which is also located at 277 Park Avenue, 31st Floor, New York, NY 10172, USA (Tel: +1 212 801 9160 Fax: +1 212 801 9163). Commodity-related products are not insured by any U.S. governmental agency, and are not guaranteed by ANZ or any of its affiliates. Transacting in these products may involve substantial risks and could result in a significant loss. You should carefully consider whether transacting in commodity-related products is suitable for you in light of your financial condition and investment objectives. ANZ S is authorised as a broker-dealer only for US Persons who are institutions, not for US Persons who are individuals. If you have registered to use this website or have otherwise received this publication and are a US Person who is an individual: to avoid loss, you should cease to use this website by unsubscribing or should notify the sender and you should not act on the contents of this publication in any way.
